### How do I use on my iPhone/Ipad -

1 - You can easily save the files to your PC and sync your iPhone/Ipad.

2 - You can use a free app such as <http://tinyurl.com/k7ssv7p>. After you install this app, you will simply do the following:

#### a - If you can access your email from a web browser:

- Open the download app, go to the built in browser on the download app.
- Sign in to your email just as you would from any other browser
- Navigate to the email receipt
- Click the download link and then you will be asked to either open or download the file

#### b - If you cannot access your email from a web browser:

- Open your email receipt on your Iphone/iPad
- Long press the download link for your purchase
- Select copy
- Then go to the download app, open the browser and paste the link in the address bar and press go.
- You will then be asked to either open or download the file.

**The file I downloaded does not play until the end** - The MP3 files are fairly large, if the program is not playing through to the end, the download may have been interrupted. Please re-download the program.
